

Pop Up Display Stands

Pop Up Display Stands are a fantastic way to create larger exhibition display areas. Several pop up display stands can be linked together to create a huge array of shapes which can be used to fill almost any area.

Key features include:

- Range of sizes and shapes available
- Quick and easy to set up
- Systems can be linked to create different configurations
- Stands pack away and will fit in a car boot
- Systems can be used with printed graphic panels or fabric panels which you can attach your own display material with velcro.
- Fast turnaround and delivery on all pop up display stands
- Optional range of lights available to enhance your stand
- Transport cases can be converted into attractive lecturns

Ultima Display Evolution Quick Fit Pop Up Display Stand

The Ultima Evolution pop up stand is a quality system with superb build quality. The wider gauge tubing on the Ultima Evolution system means that the frame itself has less flex in it's upright position and therefore graphic panels tend to require less adjustment in order to achieve the perfect fit.

The quick fix Evolution pop up includes magnetic locking arms and aluminium magnetic fixing bars which shaves off several minutes from assembly time whilst increasing reliability through cutting down on the amount of clips/catches used.

The Evolution pop up can be supplied with either printed panels or loop nylon panels (fabric). If purchasing a stand with loop nylon panels you can fasten your own prints and posters to the 'skin' with hook type velco fasteners.

- Manufactured by Ultima Displays, part of the Nimlock Group
- Manufacturers 10 year guarantee
- Robust Aluminium Frame
- Quick Fix magnetically attached aluminium fixing bars
- Compatible with a range of lights and accessories
- Standard frame height 2280mm tall (assembled size)
- Sets up in just minutes with no tools required
- Frames available in a variety of widths and 3 height options
- Selection of pop up transit cases available to make transport and storage even
